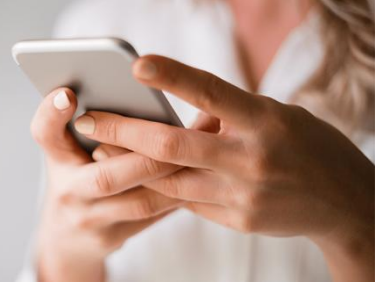
YESsafe AppProtect+



End-to-End Mobile App Protection Suite

YESsafe AppProtect+ is a comprehensive mobile app security suite designed to protect your applications across every stage of the mobile threat landscape. Built on a unified framework, it combines advanced threat detection, multi-layered protection, and intelligent response to help organizations secure their mobile applications with confidence.

500+ Million
Devices Protected

Supports

iOS | Android | HarmonyOS NEXT

Core Modules

Detect

AppProtect+ Security Validation
Static & Dynamic Analysis

AppProtect+ AppPulse
Real-Time Analysis

AppProtect+ App.AI
LLM-Based App Usage Analysis

Protect

AppProtect+ AppShield+
Mobile App Protection

AppProtect+ AppConnect
Data Protection

AppProtect+ AppSEE
API Protection

AppProtect+ AppScout
Device Finger Printing, Risk Scoring

Respond

AppProtect+ AppControl
Runtime Security Configuration

AppProtect+ AppAuth
Policy-driven Adaptive MFA

AppProtect+ AppIdentity
Frictionless SSO

DETECT
Vulnerability Against Cyber Threats

AppProtect+

Security Validation

Comprehensive Security Assessment
Evaluates mobile apps and devices using static and dynamic analysis to identity vulnerabilities and threats

Best Practice Validation
Reviews app architecture and operating environment to ensure alignment with security best practices

Standard-Based Evaluation
Checks apps against the latest OWASP and CWE vulnerability databases to guard against known risks

AppProtect+

AppPulse

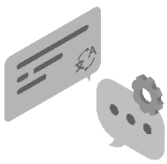
Real-Time Threat Monitoring
Detects and analyses ongoing attacks and vulnerable devices to support proactive defence

Usage Analytics
Tracks mobile app usage, including user device type, location, and peak activity for better resource planning and marketing

Actionable Insights
Delivers data-driven intelligence to guide security policy implementation and strategic decisions

AppProtect+

App.AI



Conversation AL Querying
Generate reports using simple language commands, with multi-language support for global use

Flexible Output Formats
Create reports in charts, tables, or detailed summaries to suit various needs

Automated Data Auditing
Programmatically audits logs, user activity, and system events to ensure security and compliance

PROTECT
Application APIs and Data

AppProtect+

APP

AppShield+

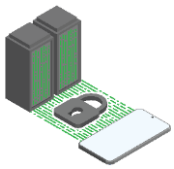
Runtime Application Self-Protection (RASP)
Solution that shields apps from tampering, reverse engineering, malware attacks and runtime attacks, ensuring protection even in hostile environments

Code Protection
Code obfuscation hides an app's logic, making it harder for attackers to find vulnerabilities or access sensitive data

AppProtect+

APP

AppConnect



Secure Communication Channel
Establishes mutual authentication between client and server components using a proprietary protocol layered over SSL / TLS

End-to-End Encryption
Ensures bi-directional data protection for APIs, preventing data leakage and securing sensitive content

AppProtect+

APP

AppSEE

Advanced Code Protection
Converts Java JVM bytecode into custom VM bytecode for execution in a secure virtual machine, hiding original code and safeguarding critical logic from exposure

Sensitive Data Security
Protect app secrets like API keys and certificates with robust encryption, preventing unauthorized access on both Android and iOS platforms

AppProtect+

APP

AppScout

Risk Scoring
Converts mobile security into a precision instrument, leveraging real-time metrics to perfectly balance robust protection and a seamless user experience.

Device Fingerprinting
Uses unique device attributes to ensure only trusted devices access your app

Copyright ©2000 - 2026 i-Sprint Innovations Pte Ltd. All rights reserved.

RESPOND
Swiftly to Neutralize Threats

AppProtect+

AppControl

Real-Time Incident Response
Allows administrators to swiftly detect, control, or shut down malicious activity during runtime

Instant Security Updates
Enables on-the-fly updates to security configurations without requiring time-consuming change cycle and distribution process of updated mobile app

AppProtect+

AppAuth

Versatile Multi-Factor Authentication
Leverages our proven AccessMatrix™ IAM Suite to enable multi-factor authentication (MFA), protecting user identities

Frictionless Access
Delivers adaptive, contextual authentication for a seamless and user-friendly login experience

AppProtect+

AppIdentity

Secure SSO Integration
Utilizes the AccessMatrix™ IAM Suite to enable secure single sign-on using industry-standard protocols like OIDC, SAML, and OAuth

Seamless User Experience
Ensures smooth authentication flows and simplifies integration for streamlines access across applications
